How to Identify Genuine NFT project?

IDENTIFYING A GENUINE NFT
PROJECT IS CRUCIAL TO ENSURE
THAT YOU'RE NOT GETTING
INVOLVED IN A SCAM OR
INVESTING IN SOMETHING
WITHOUT REAL VALUE.

By 9NFTMANIA

Here are some steps to help you identify genuine NFT projects:

- Research the Team
- Transparency
- Community Engagement
- Verification of Smart Contract
- Provenance and Ownership
- Whitepaper and Roadmap
- Licensing and Copyright
- Use of Blockchain
- Reputation and Reviews
- Scam Warnings

Research the Team

- Start by researching the team behind the NFT project.
- Look for their professional backgrounds and experience in the relevant field.
- Teams with a proven track record are more likely to be involved in legitimate projects.

Transparency

- Genuine NFT projects are usually transparent about their goals, roadmaps, and development progress.
- They provide detailed information on their websites or whitepapers.
- Lack of transparency is a red flag.

Community Engagement

- Check if the project has an active and engaged community.
- Legitimate NFT projects often have social media channels, forums, or Discord/Telegram groups.
- On these platforms investors interact with their supporters and provide updates.

Verification of Smart contracts

- If you have some technical knowledge, you can verify the project's smart contract code on blockchain explorers.
- This can help you confirm that the code is secure and not vulnerable to hacks.

Provenance and Ownership

- Ensure that the project provides clear provenance for the NFTs they are selling.
- They should prove the authenticity and ownership history of the digital assets, especially for digital art and collectibles.

Whitepaper and Roadmap

- A whitepaper should outline the project's vision, goals, and how it plans to achieve them.
- A clear roadmap helps you understand the project's future plans and milestones.

Licensing and Copyright

- If the NFTs are based on existing intellectual property, make sure the project has the necessary rights and licenses to use that content.
- Unauthorized use of copyrighted materials can lead to legal issues.

Use of Blockchain

- Verify which blockchain the project is using.
- Ethereum is a common choice, but there are other legitimate blockchains for NFTs, too.
- Ensure that the project uses a reputable blockchain.

Reputation and Reviews

- Look for reviews and articles about the NFT project from reputable sources.
- Be cautious of projects that have no external coverage or seem to be getting all their attention from self-promotion.

Scam warning

- Check for any scam warnings or negative information about the project in crypto forums or communities.
- Scammers often use phishing websites and social engineering tactics to trick users.

Contribution of 9NFTMANIA

- Considering all above facts 9Nftmania (The world famous NFT brand) initiated development of Genuine NFT Collection on Opensea market and young parrot.

Association with other NFT brands

9Nftmania has considered other NFT brands such as Metanft, Crazy for NFT, Young NFT, Coreman .

*Lots of the factors are influencing the price of cryptocurrency
Only posting/liking image on twitter to create hype does not work.*

Promotion of Paid social platform

- 9NFTMANIA has also considered paid social platform fireside Farm for awareness of genuine NFT brands.

PI ISSUE

PI network has gained much popularity in last 4 years. There are lot of person who have PI account but there is still issue with their KYC. On other hand there is hype of PI coin that its price may be \$314159 in future

Do you think the value of Pi will be \$314159 in the future?

It is observed that there are many people and organizations who are claim to accept PI against their premium services and goods.

There are several popular exchanges that have started trading IOU (I own you) contracts of PI ranging from \$30 to \$300 even without launching of PI mainnet. Posting on Twitter, facebook and other social media is free thus it is easy to create a hype of any project.

"Oil and truth must come out."

There is always something fundamental behind the growth of cryptocurrency. Let's Talk about the present situation of PI. There are Million of PI holder in the world who have done their KYC successfully. Holders who are minting from 2020 have more than 1000 PI in their wallet. Thus we could consider that the supply of PI is too much.

There are several scams that are presently being made under the name of the PI network. A lot of people are saying on social networks that they could buy PI in bulk at the rate of \$25 to \$35 and they would pay after getting a lot of PI. But they don't pay single panny after recieving PI in first lot. Why they are cheating if they could avail the services and products of more than \$314 on single PI ? These things are confusing us.

9NFTMANIA INITIATIVE

The famous NFT Brand 9NFTMANIA has opted to simulate the voting where PI NFT has been created and published on the open sea market. The initial price is set from 1 Matic to 100 Matic. Its total supply is 100 K. If you think that PI price could be \$314159, you could vote by buying this PI NFT.

“Let's see how much Oil is in the dunes. “

9nftmania is also a great holder of PI as is evident from its regular posts on the Firewire platform. The motto of 9nftmania is that holding of single PI NFT vote would create a positive impact on the worldwide acceptance of PI. So the respected person who claims that 1 PI would be equal to \$314159 could vote by holding NFT on the following link.

<https://opensea.io/assets/matic/0x2953399124focbb46d2cbacd8a89cfo599974963/10169580680698084457744770961579800601810015729741934802609293746283126818464>

Why Invest PI NFT

- 9NFTMANIA has developed three PI NFT at opensea market place for the person who have strong believe in PI.

- 9NFTMANIA is also holder of PI and promoting its NFT on PI based social platform “Fireside Farm” on regular basis.
- Every post on “Fireside Farm” requires fire and 100 fire = 1PI.
- Thus 9NFTMANIA has to make expenditure in form of PI.

Worth of PI NFTs

- Till now 9NFTMANIA has spend about 100+ PI on the “Fire side” Farm in order to promote these NFTs on regular basis.
- Because there is approximately 2-3 PI consumption to generate fires on regular bases.
- So you could judge the worth of these NFTs.
- Calculation of Present cost of "Vote for "One PI=314,159\$" NFT
10000+ FIREWIRE have been used till now to promote this NFT

$$10000 \text{ FIREWIRE} = 100\text{PI}$$

Total supply of NFT is 100000

$$\text{Rate of each NFT in PI} = 100/100000 = 0.001$$

Thus 0.001 PI is the present rate of this NFT.

If conscious value of PI is considered \$314159

Then the cost of Each NFT should be at least

$$\text{\$}314159 \times 0.001 = \text{\$}314.159$$

But present price of this NFT is \$1 to \$10

And you may buy it from Opensea market place
